GO 4 Schools is a powerful, joined-up, easy-to-use, online system that allows your staff, students and parents to access the information they need – 24/7 – to work together to improve student outcomes.

GO 4 Schools is unique in the way live current grades are calculated within the Markbook module to measure against school target data. A MIS feed into GO 4 Schools automatically picks up student demographic data e.g. pupil premium, SEN, etc. to enable further filtering of your data to identify key focus groups for intervention.

When linked to attendance and behaviour data this is a very powerful tool to identify and make strategic decisions for school improvement. GO 4 Schools' holistic approach is designed to give you a pathway to get from where you are now to where you want to be. Our complete training offer supports your staff development and confidence in the effective use of school data.

School information

We believe that GO 4 Schools is an excellent product that could enhance the data intelligence and performance of schools at all levels, ensuring that staff, students and parents work together to achieve the best outcomes. As part of our teaching school status, where we find that schools at both primary and secondary levels are looking for training in the use of interpretation of data, efficient data solutions are sought after. We are able to offer seminars, conferences and training sessions for up to 30 delegates for both primary and secondary.
