School information

We believe that GO 4 Schools is an excellent product that could enhance the data intelligence and performance of schools at all levels, ensuring that staff, students and parents work together to achieve the best outcomes. As part of our teaching school status, where we find that schools at both primary and secondary levels are looking for training in the use of interpretation of data, efficient data solutions are sought after. We are able to offer seminars, conferences and training sessions for up to 30 delegates for both primary and secondary.
