

Data managers:

Analysing data

A training course specifically developed for school Data managers that need to improve their knowledge in the use of data analysis tools in GO 4 Schools.

Enabling you to support school improvement by identifying patterns and trends and monitoring the effectiveness of interventions.

Course Details:

This course is specifically aimed at Data managers or school support staff who are responsible for the daily administration of GO 4 Schools and who also want to understand how to analyse data within GO 4 Schools to support Senior and Middle leaders.

Key aspects covered:

- Student attributes – set up and using for analysis of key focus groups
- Key statistics and performance measures
- Subject statistics overview
- Using subject interactive ribbons effectively
- Using Data Explorers for more detailed analysis and sharing with key staff
- Using charts for pivot tables and scatter charts
- Generating snapshots of reports to analyse progress over time and cumulative data.

Building knowledge will help Data managers to set up high quality data views for analysis for all staff at all levels, embedding the use of data to support school improvement and engagement. No need to print out data reports and more time to validate the accuracy of the data produced.

A system health check is completed for all attending schools with advice on your set up.

Time will be given for delegates to discuss and share ideas of how they are using GO 4 Schools.
