

Data team collaboration:

Analysing data

A training course specifically developed for the Data manager and Senior leader responsible for assessment to work together to improve their implementation of GO 4 Schools.

Ensuring accurate data and using analysis tools to support your journey of strategic school improvement.

Course Details:

This course is set up to enable the Data manager responsible for the daily administration of GO 4 Schools to collaborate with the Senior leader responsible for student outcomes and school performance. These two key roles will have the opportunity to discuss their approach to recording and embedding data across the school by ensuring an accurate and effective set up that supports interventions and positive student outcomes.

Key aspects covered:

- Student attributes—setup and using for data analysis
- Key performance measures across the curriculum
- Subject statistics and in year tracking
- Effective use of the interactive ribbons
- Using Explorers for more detailed analysis and sharing with key leaders
- Using Charts for more forensic analysis
- Generating snapshots of reports to analyse progress over time
- Headline dashboard views for effective tracking

Time will be given for delegates to discuss, in their working pairs, action plans for change and sharing ideas of how they are using GO 4 Schools with other delegates.

A system health check is completed for all attending schools with advice on your set up.
